Spot the Bug

TH3 SPACEIO

SPACEIO // CLASSROOM

Teach secure coding with a game your class won't forget.

For lecturers, bootcamps and tech leads. Everyone plays the same ten snippets at once, then you walk through the answers together on the projector.

Class board · K7Q2XM

1	Tolu	3,119
2	Amaka	2,804
3	Ibrahim	2,610
4	Chidi	2,377

ROUND BY ROUND · CLEAN

Round 1 · Airtime top up 92%

Round 4 · Transaction PIN storage 38%

Round 7 · Account opening with BVN 71%

Most common wrong answer on round 4: **SQL Injection**

1 **Start a class**

Sign in, name the class, pick a level and how long it stays open. You get a 6-character code, a link and a QR code.

2 **Students join from their phones**

They scan the code and quick join with just a username. Ten rounds, one go each, no email needed.

3 **Debrief on the big screen**

See who found which flaw, the wrong answer picked most often, and open any round to show the vulnerable line next to the fix.

FREE Classes are free for teachers and trainers. Companies and bootcamps can also get a private team board, open every day: th3officialspaceio@gmail.com
